New Municipal District To Include Mining Areas

(The Drumheller Mail)

Creation of an industrial municipality, embracing all the mining area in the Red Deer Valley with the exception of the City of Drumheller and the Village of Newcastle, was mooted at a citizens' meeting held on Saturday at the Elks club rooms, which was addressed by Robert English, Deputy Minister of Municipal Affairs.

Mr. English in his opening remarks stated that in view of the fact that the Municipal District of Carbon had got to a point where no more money was available for relief, it was necessary to take drastic steps in order to relieve the situation. "I think you will agree with me that the Provincial Government has done everything possible to relieve the situation," Mr. English remarked "but it is now essential that some means be taken to see that the man who receives shall also contribute. We have conceived the idea of taking an area where we know people are holding coal leases and creating an improved industrial municipality which will be administered by the government."

The Deputy Minister stated that the proposal would be placed before the Provincial Government at the forthcoming session of the legislature, and if adopted, would be made retroactive to January 1, 1931.

With the Municipal District of Carbon in debt to the banks to the extent of \$100,000, twenty-four thousand of which had been paid out in relief works, it was necessary that the mining industry should assume a greater measure of financial responsibility, the speaker stated.

Under the proposed scheme, people holding coal leases, whether developed or not, would be taxed for their land and improvements, while departmental assessors would also assess the dwellings of individuals residing within the new area. This assessment and tax collection would be carried out entirely by the Province and no council or other form of local government would be introduced.

Residents within the area would make their requirements known to the member for the constituency or to Provincial resident officials, Mr. English added. In pointing out the benefits of this proposal, Mr. English remarked that the average cost of administration for a Municipal District of nine townships was \$5,000 per annum, while the districts administered by the Province contributed only \$1000 for administrative purposes. Furthermore, if the proposed district were opposed by the citizens, it would mean that they would be called upon to pay heavier taxes to the existing Municipal Districts. He had just concluded a conference with the coal operators and he believed they were now agreeable to the scheme.

In reply to a question, the Deputy Minister stated that the government would handle all matters with the exception of schools, which system would remain unchanged. The proposed municipality extended to Fox Coulee to the north, Kirkpatrick to the west, East Coulee to the East and Wayne in the south-east. The department had included all known coal leases in the area.

SHERLOCK HOLMES COMES TO THE CARBON THEATRE

Sherlock Holmes has at last visited Canada. The famous fiction sleuth of the Sir Arthur Conan Doyle books has at last left his English haunts and "come over." The reason for his visit is to track down the murderer of his friend, Captain Longmore.

The Sherlock Holmes books have been the favorite detective fiction for the past 40 years. Now "The Return of Sherlock Holmes" takes place as a Paramount feature at the Carbon Theatre on Saturday night of this week.

Clive Brook is cast in the role of the famous man-hunter. The story centers around the murder of Captain Longmore, an old friend of Sherlock Holmes. As the master sleuth goes into the case he finds that Captain Longmore was implicated in a vast radio-tapping ring of international operations. In finding the murdered, Holmes also uncovers this organization and succeeds in wiping it out.

NEW PEACE RIVER RAILWAY HAS BEEN OPENED UP

Pushing farther into the north of almost consistently produces the world's great Peace River Country,

TAKE NOTICE

TAKE NOTICE that the Village Council have authorized the Dog Catcher to destroy all dogs not licensed after January 31st. Dog owners or harbourers of dogs who wish to save their pets are asked to procure a license from the Secretary-Treasurer of the Village immediately.

Also take notice that all persons who wish to continue in the Dray Business must have their licenses on or before January 31st, 1931, or quit draying.

ALEX REID,
Secretary-Treasurer
Village of Carbon

which almost consistently produces the world's best wheat, the new section of the Northern Alberta Railway, running north-west from Mythe fifty miles and crossing the boundary between Alberta and British Columbia, has just been opened. Hundreds of settlers and pioneer business men crowded into Dawson Creek to watch the arrival of the first train. Lieutenant-Governor Egbert of the Province of Alberta, Hon. V. Smith, Minister of Railways and Telephones, and representatives of the chambers of commerce, and prominent business men of Edmonton and Calgary were present.

MRS. BETTCHER LAID TO REST

Funeral services of the late Mrs. Sam Bettcher, who died on January 19 at the home of her son, Martin, were held from the First German Baptist Church on Friday last, at 1 p.m. The funeral arrangements were in charge of Rev. A. Ittermann and the sermon was given by Rev. A. Kujath, of Calgary. The pallbearers were Messrs. J. F. Ohlhauser, T. Neher, Emanuel Neher, John Harsch, Gottlieb Klein and John Grosz.

The late Mrs. Bettcher was born in Roumania on March 2nd, 1857 and was in her 73rd year. She leaves to mourn her loss two sons and four daughters. Interment was made in the cemetery at the Church.

Gets New Post

Forty years of railroad experience have singularly fitted George Hodge, assistant general manager Eastern Lines, for the post of manager of the Canadian Pacific Railway's new Department of Personnel. He is one of the best known and most popular railway executives on the American continent, has been the company's spokesman in labor matters on a number of important occasions, and won unstinted praise for his able presentation of the situation at the time of the McAdoo award. He is a Montrealeur, and has, with the exception of a year in London, Ont., as divisional superintendent, always had his headquarters in that city.

WHAT I'D DO

(By Walt Mason)

If I were Binks the baker, I'd tidy up my store; I would not have an acre of dust upon the floor. I'd be a skilled adjuster and make things please the eyes; I'd take a feather duster and clean the pumpkin pies. I'd keep the door knob shining, and polish up the glass, and never sit repining and never say "Alas."

If I were Binks the baker, I'd have a cheerful heart, as always the maker of bread and pie and tart; for looking sad and grewsome will never bring the trade of folks who want to shew some doughnuts and marmalade. When I go blowing money I always seek the store whose boss is gay and sunny, with gladness bubbling o'er; and when I chance to enter a bakery whose chief is roaring like a stentor about his woe and grief, his bellowings confound me, I do not spend a yen; I merely glance around me, and hustle out again.

If I were Binks the baker, and had a grouch on hand, I'd surely try to shake her, and smile to beat the band. For no one wants to harken to tales of woe and strife, to hear of clouds that darken a merchant's weary life. For customers have troubles, like you, through all their years, and when they spend their roubles they are not buying tears. They'll like you all the better, you and your cakes and jam, if you are not a fretter, a kicker and a clam.

If I were Binks, the blinker—my wires are crossed, I swear—I'd sell the pie and sinker with calm, unclouded brow. No grumbings wild and woolly would from my larynx slide; I'd swear that things were bully, and seven meters wide. The folk would all admire me, and seek me in my den, and load me till they'd tire me, with kopeks, taels and yen.

Stewart Mortimer Succumbs After Long Period of Illness

CARBON ELKS INSTALL OFFICERS

At the regular meeting of the Elks Lodge held in the Elks Hall on Thursday night last, the following officers were installed for the year 1931.

Past Exalted Ruler, Roy E. Wacker
Exalted Ruler, J. J. Greenan
Leading Knight, A. H. J. J. J.
Loyal Knight, E. J. Rouleau
Lecturing Knight, Frank Barker
Secretary, Harley C. Willson
Treasurer, I. Guttman
Chaplain, Ross Thorburn
Esquire, J. C. Spence
Inner Guard, G. Cadman
Outer Guard, J. M. Ohlhauser
Trustee for three years, H. N. McNaughton.

A number of the Elks of Carbon lodge No. 195 made the trip to Acme on Tuesday night to be present at the installation of officers of that lodge. A record crowd attended this function from Three Hills, Calgary and Carbon, well on to 200 Elks being present. The members from Carbon making the trip were Messrs. J. J. Greenan, H. C. Willson, Stan Carnev, E. J. Rouleau, Dick Gimble, Jack Spence and J. M. Ohlhauser.

ANGLICAN CHURCH SERVICES

Sunday, February 1, 1931

Litany and Sermon 11 a.m.
Sunday School 10 a.m.

REV. L. D. BATCHELOR,
Priest in Charge

FOR SALE—Upland Hay, \$11 per ton f.o.b. Phone 1311, E. L. DeWitt Crossfield.

PASTURE LAND—5 quarters pasture land for rent. 50 to 75 horses wanted. 75c per head. Emil Yanke, Beiseker.

Stewart Mortimer, an old timer in the Carbon District, died at the home of Dr. and Mrs. McFarlane on Monday night, after a lingering illness of six or seven months. The deceased underwent an operation for Cancer early last summer and since that time he has not been able to be around.

The late Mr. Mortimer was well-known in the Carbon district, having lived around here practically all his life, and the community at large will greatly miss his presence.

The deceased leaves to mourn his loss a sorrowing wife and six children, all of Carbon. He is also survived by his mother, who is living in Carbon, and two sisters, Mrs. McFarlane of Carbon and Mrs. Hodgson of Dorothy, Alberta.

Funeral services of the late Mr. Mortimer are being held from the English Church this afternoon (Wednesday) as we go to press.

TOTEM POLE IS SHIPPED TO AMERICAN MUSEUM

Canada is a land of varied produce and during her young nationhood she has seen many different cargoes leave her shores, but perhaps the most unique shipment ever marketed by Canadians is a carload of totem poles which was shipped recently from Prince Rupert, B.C. The valuable Indian relics were billed to the museum of the American Indian Haye Foundation in New York.

Along the Pacific seaboard, from Prince Rupert to Alaska, totemism was the prevalent form of worship among the Indians long before the white man came and totem poles are found on the sites of old native villages. The totem pole, a pole decorated with representations of animals, indicates social standing and is associated with religious rites. It is part of the creed of a semi-barbarous people that the totem protects them.

Aggie—You swore before we were married that never again would you gaze upon another woman.
Reggie—Of course that was merely a campaign promise.

Read For Recreation and Profit

If we are to believe what the daily press tells us—and doubtless in the main it gives us all of truth it can find—a certain professor in a United States university has written a book on "The Art Of Rapid Reading." He says that a fast reader—and almost anybody can become one by trying—can get away with 130 books a year, or around twelve a month; and if this swift reader will give but two hours a day to the matter he can read 12,960,000 words a year, which would be around 36,000 words a day. And this, mind you, exclusive of newspaper and magazine reading. Just books, you know. The professor says that any fairly intelligent reader can teach himself to read at least half again as fast as he now does.

I have not seen the professor's book, and if I should come across it, I am not likely to read it. The scope of my ambition does not embrace a desire to be a "rapid" reader. I do not wish to set myself a stint of so many books to be travelled through swiftly within a given number of months, or weeks, or days. I can get along nicely without being able to boast of having scanned 12,000,000 odd words in a twelvemonth, and I cannot muster regret at the end of a busy day if I have not done my daily 30,000 words, or ten thousand, or one thousand, or none at all. In fact, I could run quite happily and profitably for a considerable number of days without having seen a printed or written word and without having written one. I could spend the time just thinking over what I had read and deciding how much of it was worth remembering.

Why do we read? More particularly, why do we read books? Doubtless each one would give a different reason for reading, but in a general way, we read for information, for entertainment, for self-improvement, and for pleasure. I like to read in much the same way as I go for a walk. A reasonably rapid pace where the way is open and there is not much in the surroundings to claim special attention; a slower pace when I enter the woods or where the general view is inviting; a pause for some particular view or to listen to the song of a bird or to watch the ever-changing tracery of the mist in the valley or around the hill tops or to marvel over the girth and height of some forest giant; to throw myself at full length on a bank of moss and just dream. But never in any circumstance to gauge or value the walk by the number of steps I may have taken or the miles I may have travelled.

We walk for recreation—the re-creation, refreshment, upbuilding and unfolding of our bodies and minds. When we have the choice we should read for recreation, for profit, for mental and spiritual benefit, for pleasure, lasting pleasure. We should read as a prospector looks for gold, rapidly, if we wish, where there are no signs of buried treasure, carefully where the "color" shows, and with infinite leisure but keen alertness when we strike a vein or discover a nugget. For it is the nuggets, the gems, buried in the printed pages of books which give zeal and zest to reading and the discovery of which repays richly for the time spent.

Not how fast can you read, but how thoroughly, should be the chief rule for any reading that is worth while. Reading which is not worth while is sheer waste of time. Reading for the beauty of style and of thought and of expression, savoring each polished phrase as you would savor the daintiest morsel of food, till you have drawn from it all of its flavor and taste and charm. Your inner ear attuned to catch the music of the words. Your fancy alert to catch the play of fancy of the writer. Pausing now and then to chase to its lair every word you do not understand. That is the way, I take it, to read, when it is your choice to do so, for pleasure and profit.

Don't try to match the mass production of the publishers with mass reading. Better give 12,960,000 seconds to thinking than to rapid scanning of an equal number of words, if you cannot compass both. Don't read so much that you have no time left to think over what you read or have read. Taking the matter by and wide, you will get more profit and pleasure out of slow than out of rapid reading, and you will have time to garner the gems, to listen to the music and to revel in the beauty inherent in all good writing.

You can flatter any man by telling him he is flattery-proof.

Los Angeles stands on the site of an Indian village.

PAIN after eating

What many call "indigestion" is very often nothing but excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. The best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard anti-acid with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali will neutralize instantly many times as much acid,

and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this more pleasant way. A small bottle is sufficient to show its merit.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for more than 50 years in correcting excess acid. 50c a bottle; any drugstore. Complete directions for its many uses are enclosed with every bottle.

The Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the Phillips' name on bottle.

Device For Astronomers

Revolving Platform Enables Star-Gazers To Change Their Position

A piece of machinery to enable readers of the stars to ride has been built by the General Electric Company at its plant in West Lynn, Mass., and is on its way to a Harvard University observatory in South Africa.

The device is an observers' platform, which revolves in any position, enabling the astronomer following the course of a star to change his position with the rotation of the telescope. It is operated by electric motor, with push button close to the observer's hand.

The platform was designed at the suggestion of Dr. Harlow Shapley, director of the Harvard astronomical observatory. It is to be installed in the Boyden Station of the Harvard observatory at Bloemfontein, South Africa. It will be used with a 60-inch telescope.

Nerves Out of Gear

Need New, Rich Blood To Restore Their Tone

Men and women with nerves out of gear become irritable, fretful and ill-tempered. The fault is not theirs—poor health is the cause. The tired wife or mother whose household duties have worn her out; the breadwinner whose anxiety for his family have worried him until he was ill, are the ones who become run down. Their digestion becomes bad and their nerves ill-fed. The nerves like all bodily organs need healthy red blood and that red blood can best be gained through a course of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills make rich, red blood; improve digestion; strengthen the tired nerves and bring energy and happiness not only to the sufferer but to those around him. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Voices Traced To Wireless

Radio Set Left Turned On Had Policeman Guessing

Flying squads, a Black Maria, and foot police were called out when a policeman heard voices in the bar of the Gardeners' Arms, in Nelson Street and High Friars Street, Newcastle, England.

The building was surrounded and a crowd quickly gathered while the police examined the premises. Not a single window had been left open, not a single jemmy mark marred a door.

When the police eventually gained admittance they found that the wireless set had been left on when the premises were closed earlier in the day. The voice the policeman had heard was the voice of Dean Inge broadcasting.

In all infantile complaints that are the result of the depredation of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Largest Year "Salada" Tea Has Ever Known

Tremendous Increase In Sales Is Reported For Last Year

At the annual sales conference held at the Royal York Hotel, Toronto, Mr. Arthur M. Wilson, secretary-treasurer of the company, stated that in spite of the fact that the year 1930 was one of depression, generally, the "Salada" tea sales showed a tremendous increase and were the largest the company has ever experienced.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

Experiment Being Watched

Airmail and transport pilots in Chicago await with interest the result of experiments now being conducted by the U.S. Bureau of Standards which, if successful, will prevent aeroplane collisions. The proposed system involves continuous transmission of ultra-high frequency radio automatic warnings within a radius of three miles.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

Incident Is Closed

Belgian Courts Reject American Inscription For Rebuilt Louvain Library

The Belgian courts have finally decided that Whitney Warren's inscription, "Destroyed by Teutonic fury; restored by American generosity," may not be restored to the rebuilt Louvain library from which it was torn.

As an epitaph for the architect's rather absurd dream, now happily deceased, we suggest the following:—"Sought to be restored by Whitney Warren's fury; destroyed by Belgian common sense."

Expert Drivers Negligent

It is reported that in California drivers with two or more years' experience are responsible for the greatest number of accidents. The explanation may be that when some motorists become adept they lose their sense of fear and grow so confident that they are prone to take chances that less skilled drivers would avoid. Perhaps a campaign to persuade the experts to be careful is in order.

Canned Soup Factory

New Industry To Be Established At Calgary

Arrangements for the establishment in Calgary of the first canned soups factory in Canada west of Winnipeg, are being completed at the present time, and the new Alberta product will be on the market early in the year, it is announced by Burns & Co., Ltd. Investigations have been under way for some time as to the possibility of replacing imported soups by soups of local manufacture—the former, it is said, amounting to \$750,000 annually in Alberta alone.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

The native home of the banana is not known, though it is now raised in every tropical and subtropical country.

Palpitation Of The Heart Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes:—"About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Four Day Mail Transmission Between Canada and Britain Coming As Aviation Progresses

Four day mail transmission between Great Britain and Canada is seen by post office officials as a reasonable expectation within the next year or so, while the development of aviation may find letters from London being delivered in Vancouver within two and a half days.

Discussing the future of aerial services, P. T. Coolican, deputy postmaster-general, states that during some periods of the year at least the transference of mail from ship to plane in the Straits of Belle Isle should make it possible to land mail in New York ahead of trans-Atlantic liners entering that port from the British Isles.

While no announcement was made that the department contemplates inauguration of such a service, it was indicated considerable study had been given the project. A successful trial flight was made last fall when letters and newspapers were delivered to Premier R. B. Bennett on board the "Empress of Australia" as the vessel went through the straits. This meant a saving of two days at least in transmission. Decision of the United States government to institute trans-Atlantic air flights via Bermuda and the Azores has led to consideration of possibilities of flights over the North Atlantic steamship track between Britain and Canada. Mr. Coolican drew attention to the fact that the flight from the Irish Coast to Newfoundland is shorter than the single leg between Bermuda and Azores of the proposed United States service. The project in the mid-Atlantic also involves overwater jumps from the coast to Bermuda and from the Azores to Lisbon. Furthermore, it was stated fog conditions along Canada's eastern coastline are probably not worse than those in the neighborhood of Bermuda.

Even with the present cruising speed of airplanes, it is calculated mail from London would reach Belle Isle in 20 hours. This would mean a service of 30 hours to Montreal, 40 hours to Winnipeg, and 50 hours to Vancouver. With aviation companies confidently predicting machines capable of a cruising speed of 140 miles an hour in a year or so, this time would be considerably reduced.

Turning towards Asiatic communication, post office officials visualize the possibility of flights which will take Canadian airplanes from northern British Columbia into Japan, touching the United States aviation base at Unalaska in the Aleutian Islands, then following the chain formed by this group and the Kuerile Islands into Tokyo.

Paid Taxes In Cabbages

German Farmer Received Last Notice and Had No Money

The sauerkraut market in the Holstein town of Heide, Germany, is badly congested because one farmer paid his taxes in cabbages instead of currency.

The farmer had been served with a "last notice to pay," whereupon he wrote to the tax collector that he had not the money, but was willing to pay in kind.

As he didn't receive a refusal, he loaded four tons of cabbages early one morning and dumped them in front of the tax office, with a note that he considered the claim settled.

An orator is a gentleman whose voice carries farther than his opinions.

"I am sorry for you, old fellow."
"Why?"
"I bought my wife a fur coat, and she is telling your wife all about it."
—Buen Humor, Madrid.

W. N. U. 1874

A New Brain Food

Given In Large Doses Sodium Bromide Has Good Effect

Sodium bromide, which looks and tastes like table salt, is the newest mental food.

This is a surprise in the scientific world because sodium bromide long has been known for mildly depressive or sedative effects. It was given in small amounts, three to five grains.

But when tried in massive doses of 50 to 200 grains at a time upon mental patients at the Utica, N.Y., state hospital, it produced marked improvement.

The psychologists conclude that the bromide's effects on the mentally diseased are associated to a large extent with speeding up of brain functions and to some extent with improved motor co-ordination.

These are group effects, that is, not all individuals were affected in the same manner.

(By Eva A. Tingey.)

LOVELINESS ITSELF!

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Nothing could be more luxuriously lovely than this sleekly flattering evening dress. It is feminine and graceful to a degree.

It is carried out in transparent velvet in striking indelible blue—has its flounced frill and full-shaped skirt. Most proper evening dresses of this type behave in this manner this season. Just as easily could the dress be carried out in lace, a very modish medium—or in almost any very softly falling evening tissue as crepe satin, chiffon, triple georgette or sheer metal lame, etc.

The slim girdle is of self tissue and picot edged. Frills and edges can be picot-edged or finely bound.

This pattern may be obtained in sizes 16 to 20 and 36 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Bright Outlook For Canada

Optimism Expressed In Address Of Sir John Aird

Optimism in the future of Canada was the keynote of an address delivered at Toronto before chartered stenographic reporters' association of Ontario, by Sir John Aird, president of the Canadian Bank of Commerce.

Every confidence the Dominion would survive the present economic depression with greater force than ever before, was expressed by Sir John.

With the help of British capital, he proceeded, Canada would excel the United States and ever be free of domination. The speaker also hoped with the readjustment of British war debts and reparations, British capital would once again flow into the Dominion.

"I do not think it is possible Canada could have a serious panic," Sir John declared. "In 1914, the government passed the 'Finance Act' which enabled Canadian banks to borrow as much money from the government as they desired, providing they got security. I think it is one of the best on the statute books."

Canada, in the future, will be the bread basket of the United States, the speaker predicted. The United States has devastated her lands, he declared, while the Dominion has developed a good diversified farming.

Production Of Milk

Milk Production High In Saskatchewan During Month Of December

"Never do I remember the production of so much milk in the month of December of any year as there was recorded in December, 1930," O. W. Anderson, president of the Saskatchewan Co-Operative Creameries, said recently.

"The increase in production has pretty well settled the butter situation for the first time, since the announcement from New Zealand last fall. The new year is starting out better in the dairy business than the old year did," Mr. Anderson remarked.

Soviets Have New Law

Killing one of your own pigs can be made quite a worthwhile event in the Soviet Union. It might, for instance, be worth two years' imprisonment or exile. Livestock isn't increasing at the rate the government would like, so the powerful Central Executive Committee has placed a ban on killing any livestock capable of reproducing.

Many a man has a kick coming that never reaches him.

Winning Saskatchewan Communities in C.N.R. Progress Contests

Announcement of the results of the first year of the Canadian National Railways' community progress competitions for European settlements in Saskatchewan shows Edenwold, German settlement near Regina, won first place; Laird Mennonite community near Saskatoon, second; Belknap Hungarian community near Kipling, and Calder Ukrainian settlement near Yorkton, third; and Redberry Ukrainian settlement, near Yorkton, fourth. Pictures above show, left to right: (1) Judges visiting Louis Belagh's farm home in Belknap; (2) Snow-bird school in Laird district; (3) An orchard scene on the farm of H. H. Funk in Laird district; (4) School at Calder; (5) Agricultural Hall in Edenwold; (6) Farm home of W. Winkler in Edenwold.

Hinterland Of Alberta, The Farthest North Part of Canada, To Be Mapped From The Air

In striving to comply with the insistent demand for accurate maps, geographers and mappers now have the aid of the aeroplane plus photographic equipment. By this means 4,870 square miles in the extreme northeast corner of Alberta, in the same latitude as Leningrad, Russia, has been mapped, in the Exploratory Edition of the Fitzgerald sheet of the National Topographic Series.

The new map, which is on a scale of four miles to the inch, is obtainable upon application to the Surveyor General, Ottawa, for the sum of twenty-five cents in sheet form, or for fifty cents, if on linen back or in folder cover.

A portion of Lake Athabaska occupies the southeasterly corner. In the fur-trading days this lake was about 70 days canoe travel from Fort William, the old capital of the Northwest Company. Now the aviator-surveyor takes only as many hours to make the trip, including time for refuelling. By train and steamer seven days are required for this journey.

Slave River, connecting Lake Athabaska and Great Slave Lake, divides the Fitzgerald area into two distinct classes of country. To the west is an almost level plain with few lakes but many sloughs and hay meadows varied by salty plains, in some cases grass-covered or with growths of young poplar. This is a natural range country. Horses and cattle from Fitzgerald and Fort Smith graze over it all the year round, and come out in the spring in splendid condition.

Here, too, is the last remnant of the wood buffalo. In the past few years bison from Buffalo National Park at Wainwright, Alberta, have been brought in and, together with the wood buffalo, are increasing rapidly.

All of the mapped territory east of the Slave River forms part of the great Precambrian shield, displaying rocky ridges and knolls with netted lakes between them. Along the river on this side is a fringe of large spruce with jackpine on the ridges, and spruce, tamarack and birch in the hollows. Here is fair trapping ground into which hunters from Fitzgerald and Fort Smith penetrate.

Lake trout and whitefish are plentiful in contrast to the jackfish and suckers which frequent the waters of the portion west of the Slave River. Lake Athabaska yields quantities of whitefish, which are shipped in ice on scows to Waterways, on the Athabaska River to the south, and there

loaded on express trains for Chicago and other outside points.

On Slave River between Fitzgerald and Fort Smith, a distance of 16 miles, is a source of potential water power in a series of rapids with a drop of 116 feet. These are circumvented by a good portage road served by motor trucks. A telephone line connects the two settlements.

Commenting on the timber along the Slave, Surveyor William Ogilvie, F.R.G.S., of Yukon fame, said that there was abundance of underbrush, alder, willow and hazel, including alders more than eight inches in diameter and 30 feet high, while willows were often a foot in diameter. Poplar exceeded 12 to 15 inches in diameter and grew from 100 to 120 feet high. In addition to the lumber obtainable from spruce, there is a supply of timber in this northern region for fences, buildings and fuel.

At Fitzgerald there are trading stores, warehouses, dwellings, a post office and a mission church. Here freight from the steamers is unloaded and re-loaded on trucks for the portage road to Fort Smith. Government administration buildings are located at the latter, with a mission school, church, stores, post office, wireless station and depot of the Royal Canadian Mounted Police. Both Fitzgerald and Fort Smith have a weekly mail from about April to November.

At the fort the Slave River is about a mile and a half wide. On the west side of the Slave River, opposite La Butte, about 34 miles in an air-line south of Fitzgerald, outcrops occur of about 10 feet of gypsum, overlaid by 20 feet of broken limestone. Between this and Fitzgerald are several other outcrops of gypsum on islands. The upper beds of these sections are used locally for making lime.

Southwest of Fitzgerald on the Salt River another deposit of 20 feet of gypsum is found overlaid by about 10 feet of dolomitic limestone. This escarpment extends northward for about 40 miles to the Little Buffalo River on the Peace Point map. The top of the escarpment is broken and pitted with sink holes in a way characteristic of a gypsum region.

Varied and rich are the flowers of the Fitzgerald country. Added to these are the blossoms of small fruits such as high bush cranberry, cherries, strawberries, wild currants, gooseberries, blueberries and raspberries. Wild fowl, furbearers and bigger game people the lakes, woods, and opener wilds.

Heavy Poultry Shipments

Prairie Provinces Enjoyed Good Trade During the Holiday Season

The Prairie Provinces furnished a large quota of the recent festive season's poultry supplies. Some 177,600 dressed poultry, making a total of 1,750,000 pounds, were shipped over the Canadian Pacific lines between December 3rd and 20th, inclusive. There were 30 carloads from Manitoba, 22 from Saskatchewan, and 16 from Alberta.

Soybeans In Canada

One ton of soybeans yields approximately 240 pounds of oil. In addition the resulting cake or meal has a high value for feeding cattle. This plant is chiefly cultivated in southwestern Ontario, but it is grown in all provinces and its production is increasing.

"That's nothing. For six months I have been writing on the furniture with a nail."—Pages Gaies, Yverdon.

Daily Mishaps

ZAM-BUK is a pure herbal ointment known all over the world for its wonderful soothing and healing properties. It quickly stops pain and irritation, allays inflammation and grows new healthy skin. Zam-Buk is equally as good for eczema, ulcers and piles as for the daily mishaps such as burns, scalds, cuts, bruises or cold sores. A sample free and post paid will be sent on application to Zam-Buk Co., Toronto.

MAKE ZAM-BUK A DAILY NEED

Mr. Thomas Carpenter, 376 Third Ave., Verdun, Que., writes:—"I have been a user of Zam-Buk for more than thirty years, during that time I have used it for cuts, bruises, chapped hands, skin troubles and rheumatism, and it has always given great satisfaction in healing wounds, and relieving pain. My personal opinion is that it is one of the best Ointments on the market."

WORLD HAPPENINGS BRIEFLY TOLD

Victoria, B.C. residents, by a 1,713 majority, voted against sale of beer by the glass.

British Columbia is planning a celebration for her diamond anniversary on July 20.

A series of mysterious disappearances of boatmen in southeastern Alaska is being investigated.

Mr. Justice Hyndman, of the Alberta Supreme Court has resigned to accept an appointment as head of the pensions appeal board at Ottawa.

The King lost one of his best friends in the death at London, England, of Sir Charles Cust, equerry to His Majesty since 1892.

President Hoover may go to Ottawa to lay the cornerstone of the new legation chancery building which the U.S. Government proposes to build.

Sir Francis Oswald Lindley, veteran of the British diplomatic service and ambassador to Portugal since 1929, is appointed ambassador to Japan.

World wheat production for 1930, exclusive of Russia and China, was estimated by the U.S. Department of Agriculture at 3,778,000,000 bushels, compared with 3,498,000,000 bushels in 1929, an increase of 8 per cent.

A 17-year-old boy was reported to have found at Larkville, Australia, a gold nugget weighing 78 lbs., and worth \$5,000 (about \$26,786.) The nugget was said to measure 26 inches by 12 by 3.

The importance of a direct outlet to the Pacific Coast for the Peace River country was stressed by Herman Trelle, king of wheat growers, addressing the On-to-the-Peace Association at Vancouver.

The "Nautilus," the submarine in which Sir George Wilkins expects to reach the North Pole, has been taken from the Philadelphia shipyards to Camden, N.J. Sir George expects to start his trip the second week in March.

Persian Balm creates lovely complexions. Velvety smooth. Cools and relieves the skin. Makes it delightfully soft-textured. Alluringly fragrant. Delightful to use. Swiftly absorbed by the tissues, imparting that elusive charm so distinctive of the dainty woman. Persian Balm protects the delicate skin. Preserves and enhances the loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivalled as a flawless aid to beauty.

Pedigreed Poultry

Valuable Shipment Sent From B.C. To Japan

A consignment of pedigreed poultry valued at \$4,590 was recently sold to the Emperor of Japan by the R.O.P. Co-Operative Association of Vancouver. This British Columbia poultry will be used on Government farms in the various Japanese prefectures as the foundation stock for the increased Japanese industry.

All of Australia that is not city, town or suburb, is referred to there as "the bush."

SUNDAY SCHOOL LESSON

FEBRUARY 1

JESUS THE GREAT PHYSICIAN

Golden Text: "Surely He hath borne our griefs, and carried our sorrows."—Isaiah 53:4.

Lesson: Luke 4:31 to 5:39.

Devotional Reading: Isaiah 53:1-6.

Explanations and Comments

The Cure Of Peter's Wife's Mother, 4:38, 39.—Leaving the synagogue where He had preached and had restored the demoniac to sanity, Jesus went to the house of Peter to find all greatly alarmed over the high fever of Peter's mother-in-law. They appealed to Jesus for help, and not in vain, for He stood over her and rebuked the fever, and she was so completely restored to health that she arose and ministered to them.

The Cure Of All Sorts and Conditions Of Ailments, 4:40, 41.—The fame of Jesus spread, and friends of the sick brought them to Him, and were not disappointed, for He healed them all. How did He do it? We cannot explain it. Dean Brown does so partially: "He aimed to secure the co-operation of the expectant hope and confident trust of the patient. He worked in atmosphere of sympathy and faith. When He found Himself in an atmosphere of unbelief, 'He could do there no mighty work.' He added to that widely resident impulse toward recovery the power of His own wise, loving personality. And somehow these energies availed for the recovery of many from their natural ills. 'Violations of natural law?' Rather the addition of a higher force which altered the possibilities in that situation as men had sensed it!"

Preaching and Healing In Galilee, 4:42-44.—When day came, Jesus went away to a lonely place for prayer (Mark 1:35), but the multitudes followed Him, and sought to prevent His leaving them. "I must preach the good tidings of the Kingdom of God to the other cities also," He declared, "for therefore was I sent." Did the demand upon His healing power present a very real temptation to Jesus? Did His sympathetic heart make Him yearn to give all His time to the sick and afflicted? May He not have wrestled in prayer for strength to turn from the joy of healing to the far greater work of preaching, the work for which He was sent? The proclamation of the good tidings of the Kingdom of God was of infinitely greater importance than the healing of men's bodies, and, strengthened by prayer, Jesus left His clamoring crowd from Capernaum and went about Galilee, preaching in the synagogues.

The Cure Of a Leper, 5:12-16.—One day a leper came and, falling on his face before Jesus in reverence, cried, "Lord, if Thou wilt, Thou canst make me clean." With infinite compassion Jesus touched the loathsome sufferer and said, "I will; be thou made clean," and immediately the leprosy left him.

Speed Of Meteors

Speed Of Some Meteors Less Than That Of Rifle Bullet

Meteors that have travelled in the earth's atmosphere were generally slower movers than most people believe, Prof. V. W. Jackson, of University of Manitoba, said in an address to members of the Winnipeg Royal Astronomical Society. Speed of stone meteors he computed as being less than that of a rifle bullet.

Stone meteors when found, are generally imbedded only a few feet in the earth, Prof. Jackson said. They are always cold and sometimes even have a coat of frost about them.

Of the 820 meteorites that have been found, not one has ever caused a fire; but the two largest that are known have caused large areas of destruction. The world's largest meteor lies some 1,376 feet below the surface of the desert in Arizona and caused a huge crater 670 feet in depth and 4,200 feet in diameter.

Prof. Jackson told of structure of the meteorites and explained how the structures differ from any known earth forms.

Royal Bank Annual Meeting

At the annual meeting of the Royal Bank of Canada, the President, Sir Herbert Holt, referred to the world-wide depression, cited credit conditions as the chief contributing factor and reviewed developments in and prospects for Canadian industries.

He said that while the results of the Imperial Conference are naturally disappointing to the overseas Dominions, it was too much to expect that a ready-made proposal would be acceptable to Great Britain. Her trade with the outside world is relatively much more important to her than is the case with the Dominions, but proposals put forward by the Canadian delegates involved a principle rather than a plan and this principle is one which should command serious consideration. It is hoped that preliminary discussions before the proposed conference at Ottawa will lead to a common basis of agreement at that time.

Sir Herbert dealt with the principal industries of Canada, making a number of constructive suggestions. He strongly advocated that the west should be less dependent on the production of grain, substituting mixed farming. He approved of the suggested formation of an agricultural credit corporation to assist the farmers to purchase cattle, sheep and hogs.

He advocated the increased use of fertilizer as a means of ensuring more stable results, pointing out that experiments have demonstrated that fertilizers properly used will in-

crease the yield of wheat by eight to ten bushels per acre. The development of the Canadian livestock industry has not kept pace with general increase in production and we are actually importing large amounts of butter and meat. In the meantime our exports of animal products have steadily decreased. In his opinion statistics clearly point to an opportunity for greater profit by diversification.

In conclusion, Sir Herbert said: "The stability of our great industries and the strength of our financial institutions during the past year constitute a record which we may view with pride. It is this stability which is the basis for my optimism concerning the future."

Mr. C. E. Neill, Vice-President and Managing Director of the bank, confined his remarks to a discussion of the world depression and the relation of the price level to gold supplies and central bank policy. He pointed out that only the return of normal international financial relations would end the present depression and advocated a conference of the leading financial powers to formulate a plan to apply the necessary corrective measures.

The General Manager, Mr. M. W. Wilson, referred to the satisfactory manner in which the Canadian chartered banks have taken care of financial requirements in Canada during a difficult year, as clearly demonstrated that the Canadian banking system is adequate to the needs of the country in times of stress as well as under normal conditions.

Is Cancer Caused By Cooked Food

Free Use Of Raw Fruits and Vegetables Is Recommended
(By Dr. Julian P. Thomas.)

Some forty years ago, then a professor of skin diseases in a southern medical college, I made some startling discoveries which enabled me to kill external cancer. Like many doc-

How To Lose Fat and Get That Youthful Feeling

Over in Great Britain when a man is feeling "as fit as a fiddle" and looking the "picture of health" they say: "HE'S GOT THAT KRUSCHEN FEELING."

That means he takes his little dose of Kruschen Salts every morning.

It's the same in the U.S.A.—in Germany—in Holland—in Australia—in South Africa, for Kruschen Salts are now sold the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary to healthy life.

Take half a teaspoon in a glass of hot water before breakfast every morning, modify your diet and exercise regularly.

But don't miss a morning, for Kruschen not only puts and keeps the stomach, liver, kidneys and bowels in a splendid healthy condition, but purifies your blood-stream, and sends new life and activity to every part of your body.

tors making a specialty of cancer and other such troubles, I finally developed what was believed to be cancer in the stomach; and as I knew that there was no ordinary way to remove such a condition I began to use natural, uncooked foods such as fruits, nuts, fresh vegetation, etc., which apparently eradicated the trouble entirely. Many people heard of this strange experiment and, since then, many thousands of others have been benefitted by my experience.

Today, deaths from cancer are increasing so fast that every man, woman and child is in danger, so that the discoveries I made years ago become of great importance. All you have to do is to escape death from other causes long enough, and cancer is almost sure to get you. In fact, cancer and the sickness of premature old age are very closely connected. For as long as the tissues can be kept young and healthy, cancer cannot develop in or on it. But when the body in general, or in part, becomes lowered in vitality, then look out.

Women are more prone to cancer than men, for it is said that 1 out of every 8 women, and 1 out of every 12 men, who reach the age of 40, develop cancer.

In a recent month Spain exported nearly 20,000,000 pounds of olive oil.

U. F. A. OFFERS PLAN TO ASSIST THE PRODUCER

Calgary, Alberta. — Request that Canada's government take over the 1930 wheat crop, paying producers in wheat certificates, was entered at the annual convention of United Farmers of Alberta. The certificates, it was proposed, would be redeemable in wheat and receivable in payment of taxes.

Payment in certificates of a price to producers approximating cost of production, was advised in the resolution advanced by George Bevington, of Winterburn, agrarian authority on finance. Actually, explained Mr. Bevington, the wheat certificates would be read "trade dollars," not necessarily based for redemption on wheat, but good outside Canada for any commodity produced in the Dominion.

William Irvine, M.P. for Wetaskiwin, associated himself with Mr. Bevington in the resolution, which was approved unanimously by the delegates representing more than 18,000 Alberta farmers. Other important resolutions sought an early parley of wheat exporting countries to seek stabilized wheat production and export prices, and a packers' and livestock men's meet to gain an agreement with Britain for regular monthly minimum shipment of livestock and dairy products.

The proposals were contained in a lengthy memorandum from the U.F.A. board of directors entirely after a full day of debate. The document, as supported by the convention, asked tax and interest reduction, farm relief, credit reform, market extension and tariff revision.

Winnipeg May Have More Representatives

Increase Of Two Seats In Provincial House Contemplated

Winnipeg, Man. — Increase in Winnipeg's representation in the provincial government to 12 seats is contemplated by the Bracken administration, it has been learned in authoritative circles. At present the city has ten seats in the legislature on a basis of proportional representation. The government, it is stated, plans to bring the suburbs of St. James and Kildonan within the city representation, adding two seats.

Building New Roads

United States To Spend Huge Sums This Year On Extensive Program

New York. — New roads long enough to circle the globe will be built in the United States by the straining muscle of some 300,000 workmen this year at a cost not far short of a billion dollars.

Upwards of 9,000 miles of the approximate 25,000-mile total will be hard surface. This is exclusive of 11 states in which highway commissioners could make no mileage estimates.

Western Exhibition Officers

Winnipeg, Man. — N. W. Kerr, K.C., Brandon, Man., was elected president of the Western Canada Association of Exhibitions at the closing session of the annual convention here. C. M. Baker, Calgary, was named vice-president, and S. W. Johns, Saskatoon, secretary-treasurer.

Sentenced By Court Martial

Devonport, England. — A naval court martial sentenced Able Seaman Benjamin Towl to six months' hard labor and dishonorable discharge from the service in connection with the short-lived trouble aboard the submarine depot ship "Lucia" recently. He was the second enlisted man to be tried. Thirty men were involved.

Report Cromer Refuses Post

London, England. — It was reported unofficially that the Earl of Cromer, Rowland Thomas Baring, had been offered and had refused to accept the governor-generalship of Canada. The report was apparently from a reliable source. Lord Cromer has been Lord Chamberlain since 1922.

W. N. U. 1874

No Official Calls In Cuba

Change Necessary In Program For Prince Of Wales

Havana. — The Prince of Wales and Prince George, who are making an 18,000-mile tour of Spanish America in behalf of British trade, will not leave their ship when it reaches Havana, January 31.

The British legation has informed President Machado that because of the shortness of time available here and the court mourning for Piness Louise, a change in program had been necessitated which would prevent their paying any official calls in Cuba.

Despatches from their ship, the "Oropesa," which left Vigo, Spain, yesterday morning, say the princes are enjoying their trip and participating in the ship life with other passengers. The "Oropesa's" first stop is at Hamilton, Bermuda.

Hail Insurance Losses Heavier Last Year

Report States Many Companies In Alberta Forced To Withdraw

Toronto, Ont. — Canadian hail insurance losses were heavier last year than in 1929, but not so heavy as in 1927 and 1928, it was stated here by delegates to the Canadian Hail Insurance Companies' convention.

Several losses in Alberta had caused the withdrawal of many companies from Alberta, delegates said, and unless certain legislation sought by the companies was enacted, many more Alberta companies would be forced to withdraw.

ADVERSE VOTE DOES NOT END LABOR PARTY

London, England. — Amid the echoes of age-old religious controversies — struck from behind — its own ranks divided — the MacDonald Government was defeated in the House of Commons by a vote of 282 to 249. As the position of the tellers at the clerk's table told the story of the reverse on a clause of the Education Bill the House was plunged into a commotion with the Conservatives shouting: "Resign, resign."

But although the defeat came in the report stage of its own education bill there was no question of a government resignation. Prime Minister Ramsay MacDonald held the vote did not involve a question of principle. The government would, he said, accept the decision of the House and would proceed with the bill.

At this juncture, Rt. Hon. Winston Churchill, who is sometimes termed the Arch-Conservative, arose to proclaim in scornful accents that Mr. MacDonald was "the greatest living master of falling without hurting himself." The government had been defeated by more than 30 votes yet the prime minister, said Mr. Churchill, had airily announced he intended to go ahead as though nothing had happened.

The Conservatives then attempted to press their advantage by moving the adjournment of the House. But here the Laborites who voted against the government on the education clause intimated that, were the motion pressed, they would again give the government their support. Thereupon the motion to adjourn was dropped and the House proceeded with the bill.

A few hours later the amended bill was passed by a vote of 256 against 238, and now it goes on to the House of Lords.

The defeat of the government came off an amendment moved by John Scurr, Roman Catholic Laborite from Mile End.

The English elementary schools are administered under the dual system of state-owned, or provided schools, and religious, or non-provided schools. The religious schools constitute about two-fifths of the whole and are, in the main, owned by the Church of England. The Roman Catholic schools come next in number.

All the schools are state-supported but in cases of the non-provided school, the buildings and property of a religious community are concerned.

MAY COME TO CANADA

Earl of Cromer, who, as Lord Chamberlain, banned Marc Connelly's play, "The Green Pastures," from English stage, is being persistently mentioned as possible successor to Lord Willingdon as governor-general of Canada.

British Policy In India

People Of India Disposed To Judge New Constitution On Merits

Calcutta, India. — Referring to Prime Minister Ramsay MacDonald's statement at the close of the Indian Conference in London, England, the newspaper "Liberty," which represents some sections of the Nationalist Congress, admitted there were passages which revealed the anxiety of the British government to introduce some elements of popular responsibility in the Indian administration.

The newspaper, of which Subhas Chandra Bose, mayor of Calcutta, and president of the Bengal Congress, is a director, said, however, that the people would judge any new constitution by the ordinary test of how far it would ensure responsibility in practice, taking into account the proposed reservations.

Subhas Chandra Bose is at present serving a prison sentence for his activities on behalf of the Nationalists.

World's Poultry Congress

Ottawa, Ont. — Word has just been received here of the appointment of F. C. Elford, Dominion poultry husbandman and past president of the World's Poultry Science Association, as a member of the executive named by the government of Italy to carry out arrangements for the fifth world's poultry congress, which is to be held in Rome in 1933.

No Official Date

Ottawa, Ont. — Rumors in the capital are that parliament will open during the middle week of March. No official announcement however, has been made.

Gibraltar. — The British battle cruisers, "Renown" and "Tiger," have been placed under quarantine because of an outbreak of influenza among their crews.

Special Flag May Be Used

Rumor Says New Governor-General Will Fly Own Flag

Ottawa, Ont. — While official announcement is lacking, it is rumored here that with the approval of the King the next Governor-General of Canada will fly his own flag, as personal representative of His Majesty. At present the only flag officially recognized in Canada is the Union Jack.

Cape Town, South Africa. — South Africa already flies its own national flag alongside the Union Jack, and now the governor-general is to have his own flag as the personal representative of His Majesty.

The new governor-general is the Earl of Clarendon, and his flag will consist of a blue ground on which is the royal crest in gold, with the words "Union of South Africa" above the crest and the same words in Dutch below it.

His Majesty has given approval for the use of the flag.

Canadian Trade Decreased

Unfavorable Balance Shown For Twelve Months Ending December, 1930

Ottawa, Ont. — Canada had an unfavorable balance of trade of \$103,109,126 for the twelve months ending December 31, 1930, according to figures compiled by the Dominion Bureau of Statistics.

There was a falling off in both exports and imports during 1930 as compared with 1929. Imports amounted to \$1,008,479,479, compared with \$1,298,992,692 in 1929. Exports of Canadian goods amounted to \$885,906,366 as compared with \$1,182,412,313 in 1929, and exports of foreign goods to \$19,463,987 compared with \$25,926,117 in 1929.

Russian Wheat Imports

British Government Holding An Investigation On Question

London, England. — The House of Commons witnessed a brief outburst over the question of imports of wheat from Russia.

In reply to a questioner, Rt. Hon. Christopher Addison, minister of agriculture, said the British government was examining the question of importation of wheat from Russia and its effect on British agriculture. He was unable to say, however, when the British government would issue a statement of the outcome of its inquiry.

Planetoid Approaches Earth

Toronto, Ont. — Eros, a planetoid which comes near the earth approximately every 30 years, is due to make its second appearance, since its discovery in 1898, on the 29th or 30th of this month. Its visit will afford one of the most outstanding opportunities for astronomical research that has occurred since the beginning of the century, Prof. H. R. Kingston, head of the department of mathematics and astronomy, Western University, says.

WILL VISIT OTTAWA

Photograph above shows Miss Joan Pearson (left), and her cousin, Hon. Nancy Pearson, well known beauties of English society, who will pay a visit to Ottawa during present world-tour. Attended by their grandmother, Viscountess Cowdray, they recently visited Los Angeles and will include New Orleans and Palm Beach in their travels.

CANADA WHEAT SURPLUS DATA IS REVEALED

Ottawa, Ont. — Wheat surpluses in exporting countries of the world are reviewed in a statement handed out by the Dominion Bureau of Statistics recently. Canada's surplus is given at 253,000,000 bushels. Other important exporting countries have surpluses which are estimated as follows: Argentina, 200,000,000 bushels; Australia, 165,000,000 bushels; United States, 241,000,000 bushels. The surplus in Russia is not known, according to the statement, but it has been estimated that 1,157,400,000 bushels has been harvested.

The figures given reflect the situation during the month of December as far as foreign statistics are concerned, while the situation in Canada is covered up to the middle of January.

"Surveying world situation from a Canadian viewpoint, no marked increase in demand is visible," the review states. "European countries, apart from France, will not increase their imports to any great extent. It will be remembered, however, that France has undertaken that between seven and nine million bushels of wheat will be imported during the season. From August 1 to December 31 last, the Canadian exports to France amounted to 3,739,877 bushels.

"Germany's policy with regard to imports of foreign wheat is identical with that of France, the endeavor being to force consumption of rye as bread and as a mixture with wheat. The net result in these two countries is that native wheat is selling at prices from \$1.67 to \$1.87 per bushel, while good North American wheat cannot be imported at the very low price of 65 to 70 cents per bushel."

It is stated in the review that the Argentine surplus will have to be disposed of as soon as possible on account of inadequate storage facilities. At the present time inclement weather in the Argentine is hindering large exports and also deteriorating qualities. Inadequate storage facilities are also the case in Australia which will result in that country selling in the open world market. Australia, however, is also experiencing inclement weather. With respect to Australia, a new outlet has been found in India which is taking large imports from the Antipodes.

With respect to the United States it is stated that that country is not at present a competitor in world markets in spite of large wheat stocks. Russia has forwarded 72,208,000 bushels through Black Sea ports since August 1, but recent export shipments have fallen off. It is forecasted, however, that increased shipments will be forthcoming during the winter.

Non-European countries are expanding their wheat imports, according to the review and continued dry weather in India should mean a better demand for wheat in these countries. The Orient is looked upon as an outlet for Canadian wheat.

The opinion is expressed that with seven months of the crop year remaining, the surplus of 253,000,000 bushels in Canada is not unreasonably high. Attention is drawn to the fact that the five year average export for the seven months ending July 31, was 141,115,554 bushels or 20,159,365 bushels per month. There has been a continued improvement in the exports of wheat and wheat flour during the first five months of the crop year.

To Protect Dairy Industry

Empire Council To Be Formed With Headquarters In London, England

London, England. — An empire dairy council with headquarters in London, England, will be formed according to a decision made by the Royal Empire Society.

The main objects of the council will be to co-ordinate the interests of the dairy industry throughout the empire, to take steps to protect the home and overseas empire producers from unfair foreign competition and to deal with immediate and urgent questions affecting butter and cheese.

Editor and Publisher

**TELL THE DOLLAR
WHERE TO GO**

Budget for 1931!

Tell the dollar where to go instead
of asking where it went.

Those are the highlights in Roger
Rabson's article, reproduced today. Ev-
ery business man in Carbon will be
interested in that article, because it
tells him in concise and concrete terms
some of the things he wants to know.

There are two ways of doing busi-
ness. There is the way of going blindly
ahead, spending, buying, selling, and
of trying to balance accounts at the
end of the month, and to find where
the money has gone.

And there is the way of estimating
all those accounts in advance, then go-
ing ahead on an organized basis and
KNOWING at the end of the month
where the money has gone.

Budgeting business men can tell you
how the turn in their business affairs
came when they started their budgets.
It is not easy at first. But it becomes
a knack with practice. And in any case
it is easier than that old month-end
hodgey of balancing up.

Now is the time to build on a pros-
pect of improving conditions. Now is
the time to find the waste items and
eliminate them. Now is the time to
keep contact with the public. Advertis-
ing is the method of that contact. Do
not lower your advertising expense
just because business is slack," says
Rabson. And big business firms in
many parts of the country have upheld
that view by making larger outlays
for advertising this year. Advertising
is an essential and vital factor in the
budget.

And the budget is the means to con-

serve and build up the results from
that advertising.

Budget for 1931. Look ahead, plan
ahead, and GO-ahead.

WHO ADVERTISES

(New Denver Leader)

New Denver is the only village in
the province of British Columbia hav-
ing a newspaper where the school trust-
tees do their advertising on the fence,
the only one where the churches and
sporting clubs do their advertising on
a bulletin board. It is socially a live
village, but Lord, how cheap! The man
who would offer the editor a compli-
mentary ticket would either pull it
back or have heart failure.

HEALTH FROM THE HOUSETOPS

The world and his wife—especially
the wife—have of late years acquired
a health-consciousness hitherto un-
known in the days when castor oil
babies were the vogue.

The reason of this thirst for infor-
mation is perhaps because of the ease
by which the knowledge of hygiene
may be obtained. Formerly, a wealth
of wisdom on health lines was the pos-
session of the medical men only, who
were content that the layman should
remain outside the charmed inner cir-
cle of power, and of woman's ability
to comprehend the laws of hygienic
living, they had but a slight opinion.
Hence the difficult dicta, the hierogly-
phic writing—the incomprehensible
names in which diseases were shroud-
ed.

All has been changed. Health is now
shouted from the housetops. Every
newspaper carries its health articles.
Mothers-to-be are found studying the
prenatal care. Grandmothers attend
clinics with their grandchildren to see
them weighed and measured. Health
is everybody's business. No longer,
through lack of information, must hu-
manity live on a low health plane, its
energy output reduced as its resistanc-
e capacity becomes minimised. Health

radiant and vibrating is the modern
vogue.

Every health reading parent means
a better, happier home. Daily drill of
health habits in every child in every
house is the creed of a certain society
whose members number twelve million
boys and girls.

Alberta children in their thousands
are proclaiming daily their allegiance
to the simple laws of personal hygiene
as set forth in a set of rules.

These short and easily understood
rules contain the wisdom of the ages,
and yet in their simplicity can be kept
by even the youngest in any house.

Send to Junior Red Cross, 407 Civic
Block Edmonton, for health literature.

CHAPTER IX.—Continued.

"We've had dreadful bills these last two years, you know. I was so wretched before little Nick arrived that I had help with the housework all the time, and the nurse stayed six weeks instead of three. Nick just won't scrimp at such a time; but the money melts away, and our old house always seems to need repairs. It's hard to save when you marry so young that there's no nest egg laid by for the emergencies that always come; and Nick's uncle left precious little beside the house. So I'll take your gift, Uncle Sim, and think of you gratefully whenever I spend a dollar of it."

She kissed him again, and Simeon said, as she arose: "No need o' gettin' so stirred up over a little matter of a hundred dollars. Now, dearie, you must go to bed. Maybe we better take the babies on a picnic tomorrow, if their daddy ain't goin' to be on hand. Seem's if I'd miss the boy full as much as they will."

Later, when Gay stood at her window, ready for the night, she looked up at the stars, and wondered if Nick were looking at them, too.

"Good-night, dearest," she said, as if her voice could carry across the miles. "I hope—I do hope you're missing me a little."

And at that very minute Nick was bending eagerly above a road map, a head crowned by wonderful, rippling hair, close to his own.

"It'll be a bully trip," he said, raising his eyes to meet the very blue

and innocent ones beside him. "We'll come back through Anton Bay. The view from those hills is glorious. Gosh! it'll seem good to see something besides Bakersville or State Line!"

He arose, and, accompanied by a figure in shimmering blue, stepped out through the French window to the terrace, drawing a deep breath of the fragrant air. It was then he looked up at the stars.

"Hope this weather holds till Sunday."

He stretched out a hand, but Angela protested: "Oh, don't go now! The evening's just beginning."

"Not to natives of Bakersville like myself," laughed Nick. "Besides, I promised my better-half that I'd turn in early every night, and make up some of the sleep I lost while the kids were sick. Good-night, Mrs. Halliday. Thanks for everything—the dinner—the music—and the chance to take this trip. It's a ripping night."

Once on his own porch, reluctant to go into the lonely house, Nick raised his eyes once more to the myriad stars. A curiously light and buoyant feeling swept through him; a phrase from the Gypsy song that Angela Halliday had sung, sprang to his lips; while in the tender starlight the broad highway beckoned and called with its old allure.

CHAPTER X.

On the following Sunday, at the very moment when James Halliday was at the station in Boston, taking a train for the little town only fifty miles from Bakersville, where his mother first drew the breath of life, and where she had asked to be laid to rest, Simeon Bartlett pushed back his chair after finishing a satisfying meal, and said:

"Gay, I got a scheme. I don't want to be seemin' to speed the partin' guest, but it just come over me that maybe Mis' Bemis's Josh could take you home to-day. He works to the garage, and if I can hire a car he'd drive us over. There ain't nobody else in State Line I'd trust to do it, and he can't get off only Sundays. We've had a cool spell, and by Wednesday a hot wave's liable to hit us, and travellin' back by train wouldn't be no fun. If you say the word I'll ride back with you today, and then come home along o' Josh; and when Nick comes back tonight he'll find a surprise."

Gay, who had been fighting homesickness for the last two days, readily agreed; while Sonny, always delighted at fresh adventures, shrieked with joy at the idea of seeing "Daddy," though he sobered instantly at the thought of leaving his beloved chickens.

"Couldn't me take one home, Uncle Sim?" he asked wistfully. "Couldn't me take Snowball? Sonny'd be careful and not hurt him's leg horns."

Mrs. Bemis, hastily hiding a smile behind her napkin, left the room; but Uncle Sim replied soberly: "I don't doubt his leg horns would be safe and sound, Sonny, but roosters don't think much o' automobiles, and I guess Snowball would be happier to stay at home. Most likely he'd be lonesome for his wife an' babies."

"Same as Daddy?" questioned the little boy, and Gay, snatching him up, kissed him tenderly.

Oh, it would be fun to surprise Nick! she thought happily. If he were late, and the children were in bed, she would sit on the porch in the darkness, and how glad he would be when he found her! Simeon, watching the glow in her starry eyes, felt well repaid for his sacrifice in sending them home three days ahead of time.

It was five o'clock when they reached Bakersville, Uncle Sim saw them safely in the house—carried in the milk and eggs and a baked chicken that Mrs. Bemis had insisted on their taking, and despite Gay's urging that he stay a day or two, departed with Josh Bemis, much to the regret of Sonny, whose under lip trembled as he clung to the old man in a last hug.

"There! there!" said Simeon, his own eyes moist as he unclasped the chubby arms from round his neck. "Uncle Sim'll be comin' back in no time, and maybe before you get to sleep Daddy'll be here. You take good care o' Mother now, and don't let nothin' happen to her, will yer?"

"Nope," promised Sonny, and bravely swallowed a sob as the old man turned to put his cheek lovingly against the baby's, and to kiss Gay.

"You don't by no means feel nervous here alone, do you?" he asked anxiously.

and Cobourg, Ont., Canada.

It had ben a beautiful day, but now the sun was behind a cloud, and a rumble of distant thunder stirred the air.

"No," Gay answered, "but I don't like your starting off if a shower's coming."

"It ain't aimed in our direction," said Simeon, studying the heavens, "but if it overtakes us we'll get shelter somewheres. You don't need to worry about us. There's Julie Nipps over on the Hallidays' back porch. You tell her to come over here if the storm gets bad. She'll be company anyhow; and we'd ought to start right back. As 'tis we won't get home much afore dark."

"Then you mustn't loiter here, Uncle Sim; but I haven't thanked you for our visit, or said half enough about your wonderful gift. Next time you come to Bakersville I shall look like a bride!"

"You look like one now," said Simeon, "with yer eyes shinin' like that. Well, dearie, I must be gettin' on. Don't hardly know what Mis' Bemis an' me'll do without you. Give my love to Nick, and tell him his property ain't deteriorated any since I borrowed it."

Gay laughed.

"I should say it hadn't! I feel like a new woman altogether, and the babies have never been so rosy."

As the car started she lifted her baby high, while Sonny clinging to her skirt, waved a farewell. Simeon craned his neck to watch the picture till the car turned into Main Street. The clouds had darkened suddenly, and the house seemed gloomy as Gay and the children went within. She switched on a light for cheer, and looked about at her own beloved domain.

"Nick's done pretty well to keep things as neat as this," she commented, as she went to the kitchen to put away the milk and eggs. The remains of a hasty breakfast was in the sink, but except for the inevitable accumulation of dust, things were not hopeless. "In an hour I could do wonders," Gay mused, "but unless these clouds lift it's too dark to see, and I'll be frightfully tired by bedtime if I do too much. I'll just make the beds, and later on slick up the kitchen. The babies will be ready to turn in early. I wish" (with an anxious glance at the lowering sky), "I do wish Nick could come before dark."

She had started upstairs, the baby in her arms, when a voice at the door arrested her, and she turned to see Julie Nipps, the cap adorning her bobbed hair, slightly awry.

"I see you come home," she announced, stepping inside, "and thought maybe I could help. I'll keep one eye out the window and if Mis' Halliday gets back I'll cut an' run through that hole in the hedge, an' she'll never know I left the house. Think o' her not lettin' me off when she's gone all day—and him not home either! And Sunday! I'd never stay there a minute except the pay's so good, and sometimes she gives me her old clothes. Say! that lightning's somethin' fierce!"

(To Be Continued.)

Complete in itself, Mother Graves' Worm Extremator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

In quarries where beryl is found, workmen say that this mineral is a good prophet of weather changes, becoming deeper in color as humidity increases.

Little Helps For This Week

"Lord, increase our faith."—Luke xvii. 5.

The billows swell, the winds are high, Clouds overcast my wintry sky; Out of the depths to Thee I call,— My fears are great, my strength is small.

O Lord! the pilot's part perform. And guard and guide me through the storm. Defend me from each threatening ill, Control the waves, say, "Peace, be still."

—William Cowper.

If, like Peter, we fix our eyes on Jesus, we too may walk triumphantly over the swelling waves of disbelief, and unfettered amid the rising winds of doubt; but if we turn our eyes away from Him in whom we have believed, if, as is so easy to do, and as we are so much tempted to do, we look rather at the power of those terrible and destructive elements than at Him who can help and save, then we too shall inevitably sink. —Frédéric W. Farrar.

Acute Gastritis

Gets a Knockout

Mr. Arthur E. Roots, of West Croydon, writes:—"Discharged from His Majesty's Forces with acute gastritis, I was left with a very weak inside, and those who suffer similarly know how very careful one must be in what they eat and what medicines they take. Constipation and indigestion generally commenced my attacks; headaches and bad breath naturally followed; but to-day I am able to eat anything I fancy. My secret I can honestly recommend, lies in your pills. Take Carter's Little Liver Pills. All druggists 25¢ and 75¢ red pkg."

War Debts Cause Trouble

Aftermath Of Great War Retards International Trade

Time, the great healer, will remedy many ills, but the financial aftermath of the Great War will not cease to check and retard international trade relations if the nations do not take the initiative of removing or alleviating the difficulties, declared Senator F. L. Beique, president of the Banque Canadienne Nationale, in delivering his annual address to the shareholders of that institution at Montreal.

"It seems beyond question," declared the senator, "that alleviation of the war debts would be a practical and most constructive contribution to a resumption of normal economic activity throughout the world."

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist some Bismarck Magnesia and take in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Canadian Indian Education

In the Dominion of Canada there are now 350 centres of Indian education activity—78 residential and 272 day schools—under the Department of Indian Affairs.

FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse! Why postpone relief? There are many times when Aspirin tablets will "save the

day." They will always ease a throbbing head. Quiet a grumbling tooth. Relieve nagging pains of neuralgia or neuritis. Or check a sudden cold. Even rheumatism has lost its terrors for those who have learned to depend on these tablets.

Gargle with Aspirin tablets at the first suspicion of sore throat, and reduce the infection. Look for Aspirin on the box—and the word Genuine in red. Genuine Aspirin tablets do not depress the heart.

ASPIRIN

TRADE-MARK REG.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

TOWN & COUNTY Personalographs

Miss Daphne Nash is a Calgary vis-
itor this week.

Wayne Braden was operated on for
appendicitis, in the Calgary General
Hospital, on Friday last and we under-
stand that the patient is doing splen-
didly.

Commencing on Monday, February
2nd, a beginners class will be taken at
the Carbon school. All children who
are six years or over can commence
at this time, but before entering the
class their parents or guardian are re-
quested to get in touch with the secre-
tary, Mr. Reid, and make application.

The Old Timers Celebration which
was to have taken place on Tuesday
night of this week, was postponed on
account of the death of one of the old
timers, Stewart Mortimer. The commit-
tee in charge of this function are mak-

ing arrangements to hold the celebra-
tion of the old timers at a date to be
announced in the near future.

The ice at the skating rink has melt-
ed quite a bit during the warm days
of last week, but with colder weather
at nights the caretaker is gradually
building up the ice again. The curling
is also called off this week, the ice
committee deeming it advisable to get
a good body of ice before the Carbon
bonspiel, which commences on Tues-
day of next week.

Frank Barker, L. B. Hart and John
McEwan attended the U.F.A. Con-
vention in Calgary last week and return-
ing home on Thursday last they had
the misfortune of running into a bunch
of horses on the road. We understand
that the car had to be towed to town.

Roy Wacker has been digging a well
on his lots next to the residence of Rev.
Ittermann, and is now down to bed
rock. The well will be drilled to com-
pletion.

George Malton returned from the
Drumheller hospital on Thursday last
after undergoing an operation for rup-
ture.

Providing weather permits, the local
bonspiel will be held on February 3-
4 and 5. It is expected that there will
be at least 20 rinks entered in the bon-
spiel this year.

On Sunday evening, February 1st,
Rev. Wm. McNichol, chaplain of the
Carbon Curling Club, will preach a
special curlers' sermon in the United
Church. All curlers are cordially in-
vited to be present.

Snicklefritz ----

But Daddy's in the Dark

The Pastor: "So God has sent you
two more little brothers, Dolly?"

Dolly (brightly): "Yes, and he knows
where the money's coming from. I
heard Daddy say so."

"Well of all the nerve," she said, as
she slapped his face, "Don't ever try
to kiss me again."

"All right," he replied meekly, "If
that's how you feel about it, get off
my lap."

Jones had occasion to reprimand his
wife. "I think dear," he said, soggling-
ly, "that you fib a little occasionally."
"Well, I think it's a wife's duty,"
was her response, "to speak well of
her husband occasionally."

Hard Times

"Here comes the parade, and your
Aunt Helen will miss it. Where is she?"
"She's upstairs waving her hair."
"Mercy! Can't we afford a flag?"

The population of the Peace River
country has trebled in the last three
years, we are informed by a news dis-
patch. In that chilly area Old Man
stork probably found he had to hustle
to keep warm.

A recent official report states
that over 55,000 lbs. of the eight-
armed octopus were caught in 1928
and over 28,000 lbs in 1929. The
fish is eaten chiefly by Orientals
in British Columbia and brings be-
tween five and ten cents a pound
on the market. The catch is the
incidental product of other fishing
operations.

Hoist Ship Through Window

When it was decided to exhibit in a London department store for
the Christmas season, the historic half-ton water-line model of
the Canadian Pacific super-liner "Empress of Britain" which had been
featured a few weeks previously in the Lord Mayor's Show, it was
found necessary to lift the model about thirty feet in the air so that
its great size might be safely admitted to the department store by an
upper window. The photographer has caught the scene just as the
model is entering the window. Traffic was blocked for an hour during
the hoisting of the model, which was carried out with complete success.
